Nursing Diagnosis: Assessment with subjective & objective data	Patient goals & objectives "Patient will....."	Interventions: "I will....." or "patient will....."	I did.....	Outcome/Evaluation S.O.A.P. format
<ul style="list-style-type: none"> <li>• Prioritize nursing diagnosis (dx)</li> <li>• Give specific &amp; complete subjective &amp; objective data that support nursing dx</li> <li>• Give a "picture" of patient with this problem you identified</li> <li>• Nursing Dx should be from NANDA and in 3 parts: 1-"potential/actual...", 2-related to (r/t) _____, 3-as evidenced by (AEB) _____.</li> <li>• Many ways to prioritize – Maslows Hierarchy, functional level, pathophysiology</li> <li>• r/t—etiology, factors that cause or contribute to problem</li> <li>• AEB – signs &amp; symptoms exhibited by THIS patient</li> </ul>	<ul style="list-style-type: none"> <li>• This is what you want to happen to resolve/prevent the stated problem. Put in patient behavioral terms</li> <li>• Goals help determine the nursing interventions necessary for the next column</li> <li>• Goals must be realistic, specific, <u>measurable</u>, action oriented, &amp; with a time frame</li> <li>• You must be able to evaluate these goals (last column) so you must have criteria here than can be measured in some way</li> <li>• Think of goals you as the nurse can help patient achieve with your interventions</li> </ul>	<ul style="list-style-type: none"> <li>• Number &amp; list specific actions you plan to help pt. achieve goals</li> <li>• Use active language</li> <li>• Think about this in documentable terms</li> <li>• Do no use "encouraging" or "try" words that are vague</li> <li>• Use words like teach, explain, provide, monitor, administer, assess, consult/collaborate, report, etc.</li> <li>• These are client specific &amp; individualized</li> <li>• Consider needs, preferences, limitations of patient</li> <li>• Standardized care plans are fine, but <u>you must individualize</u></li> </ul>	<ul style="list-style-type: none"> <li>• Check list of items, one for each of the interventions listed</li> <li>• Place checkmarks to indicated that you did it, and if not, put in evaluation column WHY you did not</li> </ul>	<ul style="list-style-type: none"> <li>• Address same categories as in the goals &amp; objectives column</li> <li>• Ask yourself, was that goal met &amp; indicate here. For example, goal was that pt. would walk hall length 3x/day. Put here pt. walked hall 2x/day (whatever the pt. really did)</li> <li>• This is the accountability area. If goal not met, document new goal or added time if that is necessary</li> </ul>

## Sample Nursing Care Plan 1

Nursing Diagnosis: Assessment with subjective & objective data	Patient goals & objectives (patient-centered, measurable and timed)	Interventions with rationale (what you'll do and why)	Implemented (yes/no)	Outcome/Evaluation
<p>Objective:</p> <ul style="list-style-type: none"> <li>• Patient not oriented to place or time</li> <li>• Patient unable to concentrate</li> </ul> <p>Subjective:</p> <ul style="list-style-type: none"> <li>• Patient non-verbal, uses nonsensical words</li> </ul> <p>Diagnosis: Chronic confusion related to traumatic brain injury AEB disorientation and cognitive dysfunction.</p>	<ol style="list-style-type: none"> <li>1. Patient will be oriented to self within three weeks.</li> <li>2. Patient will be oriented to person, place and time by discharge.</li> <li>3. Patient will be able to perform basic ADLs by discharge independently.</li> </ol>	<ul style="list-style-type: none"> <li>• Identify self and patient by name at beginning of each interaction. (consistent orientation may help memory)</li> <li>• Maintain calm environment (decreases anxiety, promotes rest)</li> <li>• When patient perseverates, redirect attention to another topic (decreases anxiety and improves self-esteem)</li> <li>• Speak slowly and clearly in simple sentences (allows time for information processing)</li> <li>• Consult Speech Therapy</li> <li>• Educate patient and family regarding patho of injury and resulting cognitive dysfunction (assists in understanding of behavior)</li> </ul>	<p>Yes/no for each intervention</p>	<ol style="list-style-type: none"> <li>1. No measurable change yet, patient still confused and disoriented, continue goal</li> <li>2. same as above, continue goal</li> <li>3. patient performing some ADLs with physical assistance and verbal cues, continue goal.</li> </ol>

## Sample Nursing Care Plan 2

Nursing Diagnosis: Assessment with subjective & objective data	Patient goals & objectives (patient-centered, measurable and timed)	Interventions with rationale (what you'll do and why)	Implemented (yes/no)	Outcome/Evaluation
<p>Objective:</p> <ul style="list-style-type: none"> <li>• patient requests pain meds for shoulder pain often</li> </ul> <p>Subjective:</p> <ul style="list-style-type: none"> <li>• “my pain is a 10/10”</li> </ul> <p>Diagnosis: Chronic pain related to spinal cord injury AEB patients statements, request for pain meds and inability to finish therapy without complaints of pain.</p>	<ol style="list-style-type: none"> <li>1. patient will verbalize his pain as less than 7/10 during therapy by the end of this week.</li> <li>2. Patient demonstrates ability to cope with unrelieved pain within two weeks.</li> </ol>	<ul style="list-style-type: none"> <li>• Assess patient’s pain level every shift and prn</li> <li>• Educate patient regarding when to medicate for pain (i.e. before therapy)</li> <li>• Educate patient about types of pain medications including action, duration, side effects.</li> <li>• Educate the patient about types of pain common after SCI and management techniques available.</li> <li>• Administer pain medications as needed</li> <li>• Offer alternative therapies including acupuncture and massage, once cleared by MD</li> <li>• Educate on relaxation techniques, coping strategies</li> </ul>	<p>Yes/no for each intervention</p>	<ol style="list-style-type: none"> <li>1. Patient continues to rate his pain as 8-9/10 during and around therapy times, continue goal.</li> <li>2. Patient is demonstrating some coping but continues to need assistance with relaxation techniques. Interesting in massage therapy, continue goal.</li> </ol>
