# Executive Summary

Craig Hospital conducted a Community Health Needs Assessment in January 2016 to evaluate the health of persons with spinal cord injury (SCI) and/or brain injury (BI) living in a defined area to identify high priority health needs and develop strategies to address identified needs. The 2016 Craig Hospital Community Needs Assessment report represents a combination of qualitative and quantitative data gathered from a survey of former patients living in a defined area. The data from the survey were compared to statewide data obtained from the Colorado Department of Public Health and Environment (CDPHE) and the Colorado Health Institute (CHI), as well as national benchmarks from the Healthy People 2020 report. Survey results were also compared with responses received from our first Community Health Needs Survey completed in 2013.

## Key Findings and Themes:

### **General Health**

Our survey population rated their overall health better in comparison to those identified with a disability on the CDPHE and CHI surveys. The hospital's population continues to report using a doctor's office/clinic more frequently for care and has fewer emergency room visits in the past year than CHI's population. Our respondents report fewer limitations to accessing doctors, dentists, and prescription medications care due to cost when compared with CHI. We also have more non-smokers than CDPHE and our population reports fewer barriers to local health and wellness programs compared to Healthy People 2020.

### **Transportation Needs**

Respondents to our 2016 survey continue to highlight the challenges faced when it comes to transportation. More than half of the respondents identified transportation as their primary obstacle from doing things they need or like to do. This resembles the sentiment we found in our 2013 survey.

### **Increase Utilization of PCP**

More than 88% of survey respondents report having a PCP; however, nearly 6% report the emergency room is where they seek care. We want to provide resources to our population to help them better utilize a primary care physician and avoid using the emergency room for non-emergency reasons.

### **Implementation Plan from Previous Survey**

The implementation plan from the 2013 survey focused on increasing flu vaccinations, providing access to affordable dental care, and helping persons in the community remove barriers by being assertive when advocating for their needs. We worked to increase awareness of our hospital's website as a health resource; the website has been enhanced for easier navigation. The hospital used social media to promote flu vaccinations and has increased efforts to reach out to patients after rehabilitation at Craig on social media. We will continue to address these areas.

## Improvements from 2013 Survey

After completing our 2013 survey we identified 3 areas of need among our respondents;

- Flu immunization
- Affordable dental care
- Barriers to community activities and accessing assistive technologies

We focused on increasing the percent of former patients in our community receiving an annual flu vaccination by partnering with Walgreens in 2013 to provide free flu shots. We also published articles in Moving On, the hospital's newsletter, and social media to raise awareness of the importance of flu vaccination. The percent of respondents reporting they received a flu shot increased from 36% to 51% over the past three years.

Respondents to our 2013 survey identified the cost of dental care as a barrier to receiving dental care. To address this issue, our clinical care managers (CCM) developed a list of dentists in Colorado and Wyoming who provide free or reduced care based on need. The list is freely available on our website. The percent of respondents identifying cost as a barrier to receiving dental care decreased to 14% in the most recent survey from 27% in the previous survey.

The last area of focus was to address barriers former patients experience in their community after returning home. To do this we developed a video with a variety of scenarios experienced in daily lives and how to advocate for accessibility needs. The [video](#) is available on the hospital website. The next step is to divide the hour long video into shorter sections so persons in the community with a disability will be able to watch the sections most relevant to them.

## Community definition and description:

Craig Hospital in Englewood, CO has 93 licensed beds and specializes in rehabilitation care for persons with spinal cord or traumatic brain injury.

### Craig Hospital Mission Statement

*"Craig advocates for and provides exceptional patient and family centered care for those affected by spinal cord and brain injury. Together we bravely strive for optimal health, independence and life quality with unyielding determination."*

### Outpatient Services Mission Statement

*"To provide a system for long term follow up, within our area of expertise, while fostering independence in the community."*

The population for the Community Health Needs Assessment was defined as persons seen at Craig Hospital in the past 10 years, living within a 403 mile radius of Denver. This area includes all of Colorado and parts of Wyoming, Nebraska, Oklahoma, Texas, New Mexico and Utah. Of the 3301 persons identified, 88% live in urban areas while 12% live in rural areas.

**Description of our community population:**

|                           |                                         |
|---------------------------|-----------------------------------------|
| Mean age                  | 46 years                                |
| Mean age onset of injury: | 35 years (average 10 years post injury) |
| Gender:                   | 73% male                                |
| Race/ethnicity:           | Caucasian 82%; Hispanic 12%; Other 7%   |
| Diagnosis:                | Para 29%; Tetra 28%; BI/Dual 44%        |
| Marital Status:           | Single 48%; Married 42%; Divorced 11%   |

**How the assessment was conducted:**

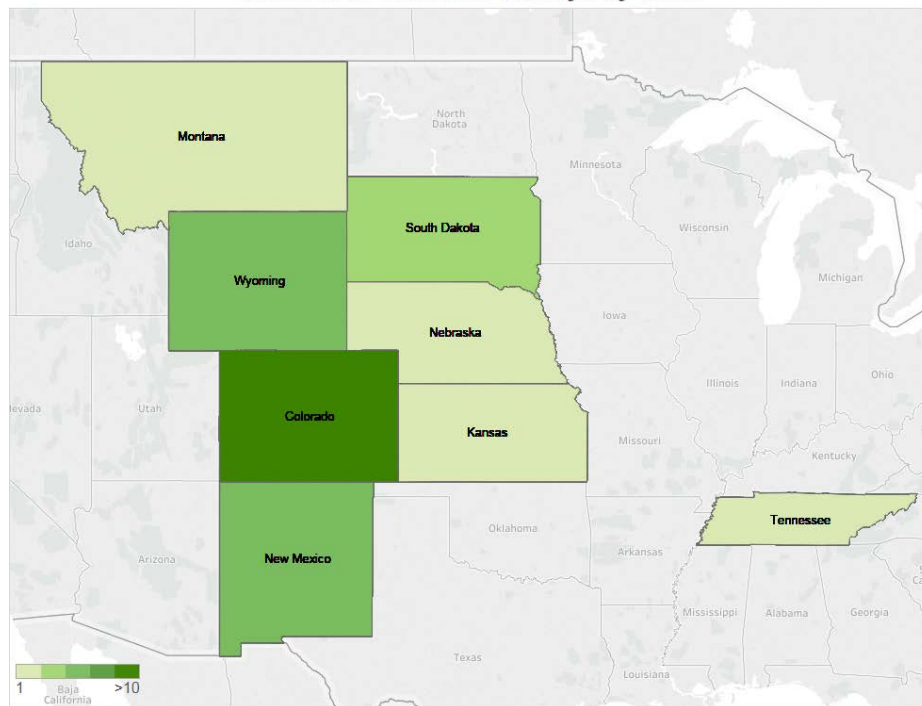

Before sending out the 2016 survey, Craig Hospital's Community Health Assessment Committee reviewed reports from similar hospitals across the country. After discussing the merits of the other reports, the committee decided to proceed with a modified version of the survey sent out in 2013.

**The Craig Hospital Community Health Needs Survey** (Appendix A) included questions from three other surveys for comparative data:

- [Behavioral Risk Factor Surveillance System Questionnaire](#) (BRFSS) done by the Colorado by the Colorado Department of Public Health and Environment (CDPHE) in 2014
- [Colorado Health Access Survey](#) (CHAS) done by the Colorado Health Institute in 2015
- [Healthy People 2020](#) – a government survey with targeted health goals for people with disability

The Craig Hospital Community Needs Assessment survey was mailed out January 18, 2016 with a cover letter, survey, and response envelope to a random sample of 700 former Craig patients. Respondents could return the survey by mail or by phone through the Nurse Advice Line. We had 151 surveys returned by mail for a response rate of 22%; none used the Nurse Advice Line. We received responses from 8 states, with 83% living in Colorado.

**Number of Returned Surveys by State**

### Who we worked with:

Community partners and individuals with special expertise were identified and invited to participate on our assessment committee. In addition to our Craig Hospital staff and alumni, the following organizations/persons were contacted:

- Colorado Health Institute (CHI) conducts the Colorado Health Access Survey (CHAS) every other year to survey health care coverage, access and utilization in Colorado. Questions from the CHAS were used on the Craig Hospital survey, to compare to our population with CHAS data from their 2015 survey. CHI reviewed our draft survey and provided feedback to improve the survey format. CHI provided comparative data from the CHAS for the general population in Colorado and the subset of those identified as disabled.
  - o Natalie Triedman, Policy Analyst
- Colorado Department of Public Health and Environment (CDPHE) collects health statistics in Colorado obtained from the Behavioral Risk Factor Surveillance System questionnaire (BRFSS). This questionnaire has been used by the state to develop a public health improvement plan. Data from the BRFSS survey from 2014 were provided on specific questions for the general population and the disability population, to compare to our survey responses. We consulted with CDPHE staff to obtain updated BRFSS survey data.
  - o Amy Anderson, Health Data Analyst

## **Problems and needs identified:**

### **How problems and needs were identified through comparisons, benchmarks and trends.**

The CDPHE and the CHAS provided data for a general disability population identified as disabled if answered "Yes" to either OR both the BRFSS Disability Questions:

- Are you limited in any way in any activities because of physical, mental, or emotional problems?
- Do you now have any health problem that requires you to use special equipment, such as a cane, a wheelchair, a special bed, or a special telephone?

We compared weighted results from our survey to results from the general disability population for the comparative questions from CDPHE and CHI. Baseline and target goals for persons with disability from the Healthy People 2020 report were compared to survey responses (Appendix B).

### **Needs Identified by Survey (Appendix B):**

The survey responses were weighted to be representative of our community living in the defined geographic area. Average age was 46 years (range 18 to 83), 73% male, and 88% identified living in an urban area. Slightly more than 83% were from Colorado, with 7 other states represented. Injury diagnosis was BI (44%), paraplegic (29%) and tetraplegic (28%). Most were white, 82%, with 12% Hispanic and 7% other.

Health related responses better than comparative data:

- 85% receive health care in a doctor's office/clinic (67%)
- 62% had not received care in an Emergency Department (58%)
- 77% self-reported health as good to excellent (70%)
- 86% were non-smokers (82%)
- 48% weight within normal range (33%)
- 47% overweight/obese (65%)
- 4.6 average days per month, poor physical or mental health interfered with activities (8.7 days)
- 14% did not get dental care because of cost (36%)
- 11% did not get specialty care because of cost (24%)
- 11% did not get doctor care because of cost (20%)
- 8% did not get prescription drugs because of cost (23%)

Health issues worse than comparative data:

- 88% had a personal doctor (89%)
- 51% received a seasonal flu shot (52%)

Open ended survey questions were displayed in word clouds to visualize the density of words in responses to the following questions (Appendix C):

- Reasons for any hospitalizations or emergency room visits.
- In your community, are there things that you need or like to do but are unable to do?

- In your community, what are the primary obstacles preventing you from doing what you need or like to do?
- In your community, what would be necessary to help you to do the things you need or like to do?

**Infections, UTIs and surgery** were the most frequent reasons identified for hospitalization or emergency room visits. The most frequent community needs identified by word cloud included **accessibility** and **transportation** to improve community access.

In our previous survey, nearly all of our patients had access to the internet. This year we asked if our patients access our website (29%) or use our nurse advice line (13%) to assess if patients access the resources we make available after leaving Craig.

### Summary of Needs Identified:

Community health needs identified through the survey

- Over half of our patients mention transportation as a primary obstacle to being active.
- 5.7% mention using the emergency room as the place they go when they need medical care.
- 49% did not receive a seasonal flu shot
- 14% did not receive dental care because of cost

### Implementation Plan

- Develop a decision tree to help patients find transportation resources in their community through a public, private, or non-profit organization.
- Continue development of resources to help disabled persons access medical services in their community through the Nurse Advice Line and the hospital website. The Nurse Advice Line staff is experienced in helping callers find a doctor in their community and guide patients in how to get an appointment with their PCP when needed.
- Continue using social media to raise awareness about the importance of receiving a flu shot each year. We will also use social media to promote the resources available on our website such as the list of dentists who provide affordable care and have accessible offices for disabled persons. The video we created addressing how patients can be assertive when advocating for their needs in the community will be available in shorter segments on the hospital website.
- Pilot a transition program from inpatient discharge to the community. Hospital staff to accompany patients home and help establish community resources for ongoing health needs, including transportation and PCP identification.

The above health needs were selected to be addressed by the hospital to provide the maximum impact on the overall health and community participation of persons with SCI and or BI living in the community.

### **Availability of the Craig Hospital Community Needs Assessment**

The final report is available on our website [www.craighospital.org](http://www.craighospital.org) and hard copies are available on request beginning September 30, 2016.

## **Craig Hospital Community Health Needs Assessment Process**

To comply with the federal tax exemption requirements in the Patient Protection and Affordable Care Act signed March 23, 2010, Craig Hospital conducted a community health needs assessments and adopted plans to meet assessed needs. The first report was due the first full tax year following March 23, 2012. For Craig Hospital, the first submission was the fiscal year ending September 30, 2013.

Members of the Community Health Needs Assessment Committee met periodically throughout the three year period to implement our plan and carry out the new assessment. The 2016 Community Health Needs Assessment plan was approved in September of 2016 by the Corporate Compliance Committee, Senior Leadership, Department Directors, Medical Care and Administrative Committee of the Board and the full hospital Board.

**Needs Assessment Leader:** Cynthia Braden, Director of Quality Management

### **Hospital Committee:**

- Chris Cusick – Data Quality Analyst
- Cat Davis – Nurse Advice Line
- Jo Donlin – former Board Member, state representation
- Amy Goldstein – Director of Pharmacy
- Cindy Lawson – Director of Outpatient Services
- Bert Menardi - Therapeutic Recreation
- Kyle Mickalowski – Quality Management
- Stephanie Percival – Director of Clinical Care Management
- Dana Polonsky – Vice President of Clinical Care
- Bill Scelza, M.D. – CNS Medical Group
- Candy Tefertiller – Directory of Physical Therapy

# Community Needs Assessment Survey

## INFORMATION ABOUT YOU:

1. Enter Year of birth: \_\_\_\_\_ 2. Gender: ☐ Male ☐ Female
3. Current Marital status – check one:  
☐ Married ☐ A member of an unmarried couple ☐ Divorced  
☐ Widowed ☐ Separated ☐ Never married
4. Number of children living at home under 18 (if none, enter 0): \_\_\_\_\_
5. Highest level of education – check one:  
☐ Less than high school (grades 1-11, grade 12 but no diploma)  
☐ Grade 12 or GED (High school graduate)  
☐ Some college but no degree (includes occupational or vocational programs)  
☐ Associates Degree  
☐ College graduate – 4 year degree  
☐ Postgraduate
6. Your current primary residence – check one:  
☐ Private residence ☐ Nursing home  
☐ Group home ☐ Homeless
7. Current primary Zip Code: \_\_\_\_\_
8. Injury diagnosis – check all that apply:  
☐ Tetraplegia (quadriplegia)- Persons with spinal cord injury at the C-8 level or above  
☐ Paraplegia - Persons with spinal cord injury at the T1 level and below  
☐ Brain Injury
9. What year was your injury? \_\_\_\_\_
10. Employment status – check one:  
☐ Employed ☐ Homemaker  
☐ Unemployed ☐ Student  
☐ Retired due to age ☐ Unable to work due to disability
11. Health insurance coverage - check all that apply:  
☐ Private insurance ☐ Workers Comp  
☐ No insurance ☐ Medicaid  
☐ Medicare ☐ Other Government Program
12. Are you of Spanish, Hispanic or Latino origin or descent? ☐ Yes ☐ No ☐ Don't know
13. Primary language spoken in the home:  
☐ English ☐ Spanish ☐ Other \_\_\_\_\_

## Community Needs Assessment Survey

14. Race - check all that apply:

- |                                                                    |                                                           |
|--------------------------------------------------------------------|-----------------------------------------------------------|
| <input type="checkbox"/> White                                     | <input type="checkbox"/> American Indian or Alaska Native |
| <input type="checkbox"/> Black or African American                 | <input type="checkbox"/> Some other race (SPECIFY) _____  |
| <input type="checkbox"/> Asian                                     | <input type="checkbox"/> Don't know                       |
| <input type="checkbox"/> Hispanic/Latino                           |                                                           |
| <input type="checkbox"/> Native Hawaiian or other Pacific Islander |                                                           |

### ACCESS AND USE OF MEDICAL SERVICES

1. Is there a place where you go when you are sick or need advice about your health?  
☐ Yes      ☐ No      ☐ Don't know
2. If you were to get sick or need a medical professional, where would you go?  
Check one:  

|                                                                           |                                                           |
|---------------------------------------------------------------------------|-----------------------------------------------------------|
| <input type="checkbox"/> A doctor's office or private clinic              | <input type="checkbox"/> A retail clinic like WalMart     |
| <input type="checkbox"/> A community health center or other public clinic | <input type="checkbox"/> Some other place: _____          |
| <input type="checkbox"/> A hospital emergency room                        | <input type="checkbox"/> Don't go to one place most often |
| <input type="checkbox"/> An urgent care center                            | <input type="checkbox"/> Don't know                       |
3. Do you have one person you think of as your personal doctor or health care provider?  
☐ Yes      ☐ No      ☐ Don't know
4. In the past 12 months, have you received care in a hospital emergency room?  
☐ Yes      ☐ No  
If yes, how many times? \_\_\_\_\_
5. In the past 12 months, have you been admitted to a hospital?  
☐ Yes      ☐ No  
If yes, how many times? \_\_\_\_\_

Please explain the reasons for any emergency room use or hospitalizations:

---

---

---

6. In the past 12 months, did you take any prescription drugs?  
☐ Yes      ☐ No      ☐ Don't know
7. In the past 12 months, was there any time **BECAUSE OF COST, YOU DID NOT:**
- |                                                 |                              |                             |                                     |
|-------------------------------------------------|------------------------------|-----------------------------|-------------------------------------|
| a. .... fill a prescription for medicine?       | <input type="checkbox"/> Yes | <input type="checkbox"/> No | <input type="checkbox"/> Don't know |
| b. .... get doctor care that you needed?        | <input type="checkbox"/> Yes | <input type="checkbox"/> No | <input type="checkbox"/> Don't know |
| c. .... get specialist care that you needed?    | <input type="checkbox"/> Yes | <input type="checkbox"/> No | <input type="checkbox"/> Don't know |
| d. .... get dental care that you needed?        | <input type="checkbox"/> Yes | <input type="checkbox"/> No | <input type="checkbox"/> Don't know |
| e. .... get mental health care that you needed? | <input type="checkbox"/> Yes | <input type="checkbox"/> No | <input type="checkbox"/> Don't know |

The information you provide for this survey will be kept confidential.

# Community Needs Assessment Survey

## IMMUNIZATION

1. During the past 12 months, have you had either a seasonal flu shot or a seasonal flu vaccine that was sprayed in your nose?  
☐ Yes      ☐ No      ☐ Don't know
2. A pneumonia shot or pneumococcal vaccine is usually given only once or twice in a person's lifetime and is different from the flu shot. Have you ever had a pneumonia shot?  
☐ Yes      ☐ No      ☐ Don't know

## YOUR HEALTH STATUS

1. In general, would you say your health is:  
Check one:  
☐ Excellent      ☐ Very good      ☐ Good      ☐ Fair      ☐ Poor
2. Now, thinking about your physical health, which includes physical illness and injury, for how many days during the **past 30 days** was your physical health not good? (0 if physical health was good)  
(from 0 to 30 days) \_\_\_\_\_ number of days not good
3. Now thinking about your mental health, which includes stress, depression, and problems with emotions, for how many days during the **past 30 days** was your mental health not good? (0 days if mental health was good)  
(from 0 to 30 days) \_\_\_\_\_ number of days not good
4. During the **past 30 days**, for about how many days did poor physical or mental health keep you from doing your usual activities, such as self care, work or recreation?  
(from 0 to 30 days) \_\_\_\_\_ number of days unable to do usual activities
5. How tall are you without shoes?    Height: \_\_\_\_\_ feet \_\_\_\_\_ inches
6. About how much do you weigh without shoes?    Weight \_\_\_\_\_ in pounds
7. Do you currently smoke cigarettes?  
☐ Every day      ☐ Some days      ☐ Not at all
8. Do you currently use chewing tobacco, snuff or snus? (Snuff is smokeless tobacco inhaled through the nose, snus is a smokeless tobacco placed under lip against the gum)  
☐ Every day      ☐ Some days      ☐ Not at all
9. Considering all types of alcoholic beverages (such as beer, wine, a malt beverage or liquor), how many times during the past 30 days did you have **4 or more drinks** (female) or **5 or more drinks** (male) on an occasion?  
\_\_\_\_\_ number of times      ☐ None      ☐ Don't know

NOTE; one drink = 12-ounce beer, 5-ounce glass of wine or a drink with one shot of liquor. A 40 ounce beer would count as 3 drinks, or a cocktail drink with 2 shots would count as 2 drinks.

## COMMUNITY ACTIVITY AND SERVICES

1. Do you participate in social, spiritual, recreational, community and civic activities to the degree that you wish?  
☐ Yes      ☐ No

## Community Needs Assessment Survey

2. Do you have physical or program barriers to local health and wellness programs?  
☐ Yes      ☐ No
3. Do you have barriers to obtaining the assistive devices, service animals, technology services and accessible technologies that you need?  
☐ Yes      ☐ No
4. Do you have environmental barriers to participating in activities:
- |                         |                              |                             |                                         |
|-------------------------|------------------------------|-----------------------------|-----------------------------------------|
| at home?.....           | <input type="checkbox"/> Yes | <input type="checkbox"/> No | <input type="checkbox"/> Not applicable |
| at school?.....         | <input type="checkbox"/> Yes | <input type="checkbox"/> No | <input type="checkbox"/> Not applicable |
| at work?.....           | <input type="checkbox"/> Yes | <input type="checkbox"/> No | <input type="checkbox"/> Not applicable |
| in the community? ..... | <input type="checkbox"/> Yes | <input type="checkbox"/> No | <input type="checkbox"/> Not applicable |
8. Have you called Craig Hospital's Nurse Advice Line in the past 12 months?  
☐ Yes    ☐ No

**You can reach the Nurse Advice Line at 1-800-247-0257. It is available to answer non-emergency questions Monday through Friday between 9am and 4pm MST.**

9. Have you used Craig Hospital's website, craighospital.org, as a resource for health related information on your injury?  
☐ Yes    ☐ No

### LIVING FULLY & INDEPENDENTLY

CDPHE defined individuals as disabled if they answered "Yes" to either OR both BRFSS Disability Questions:

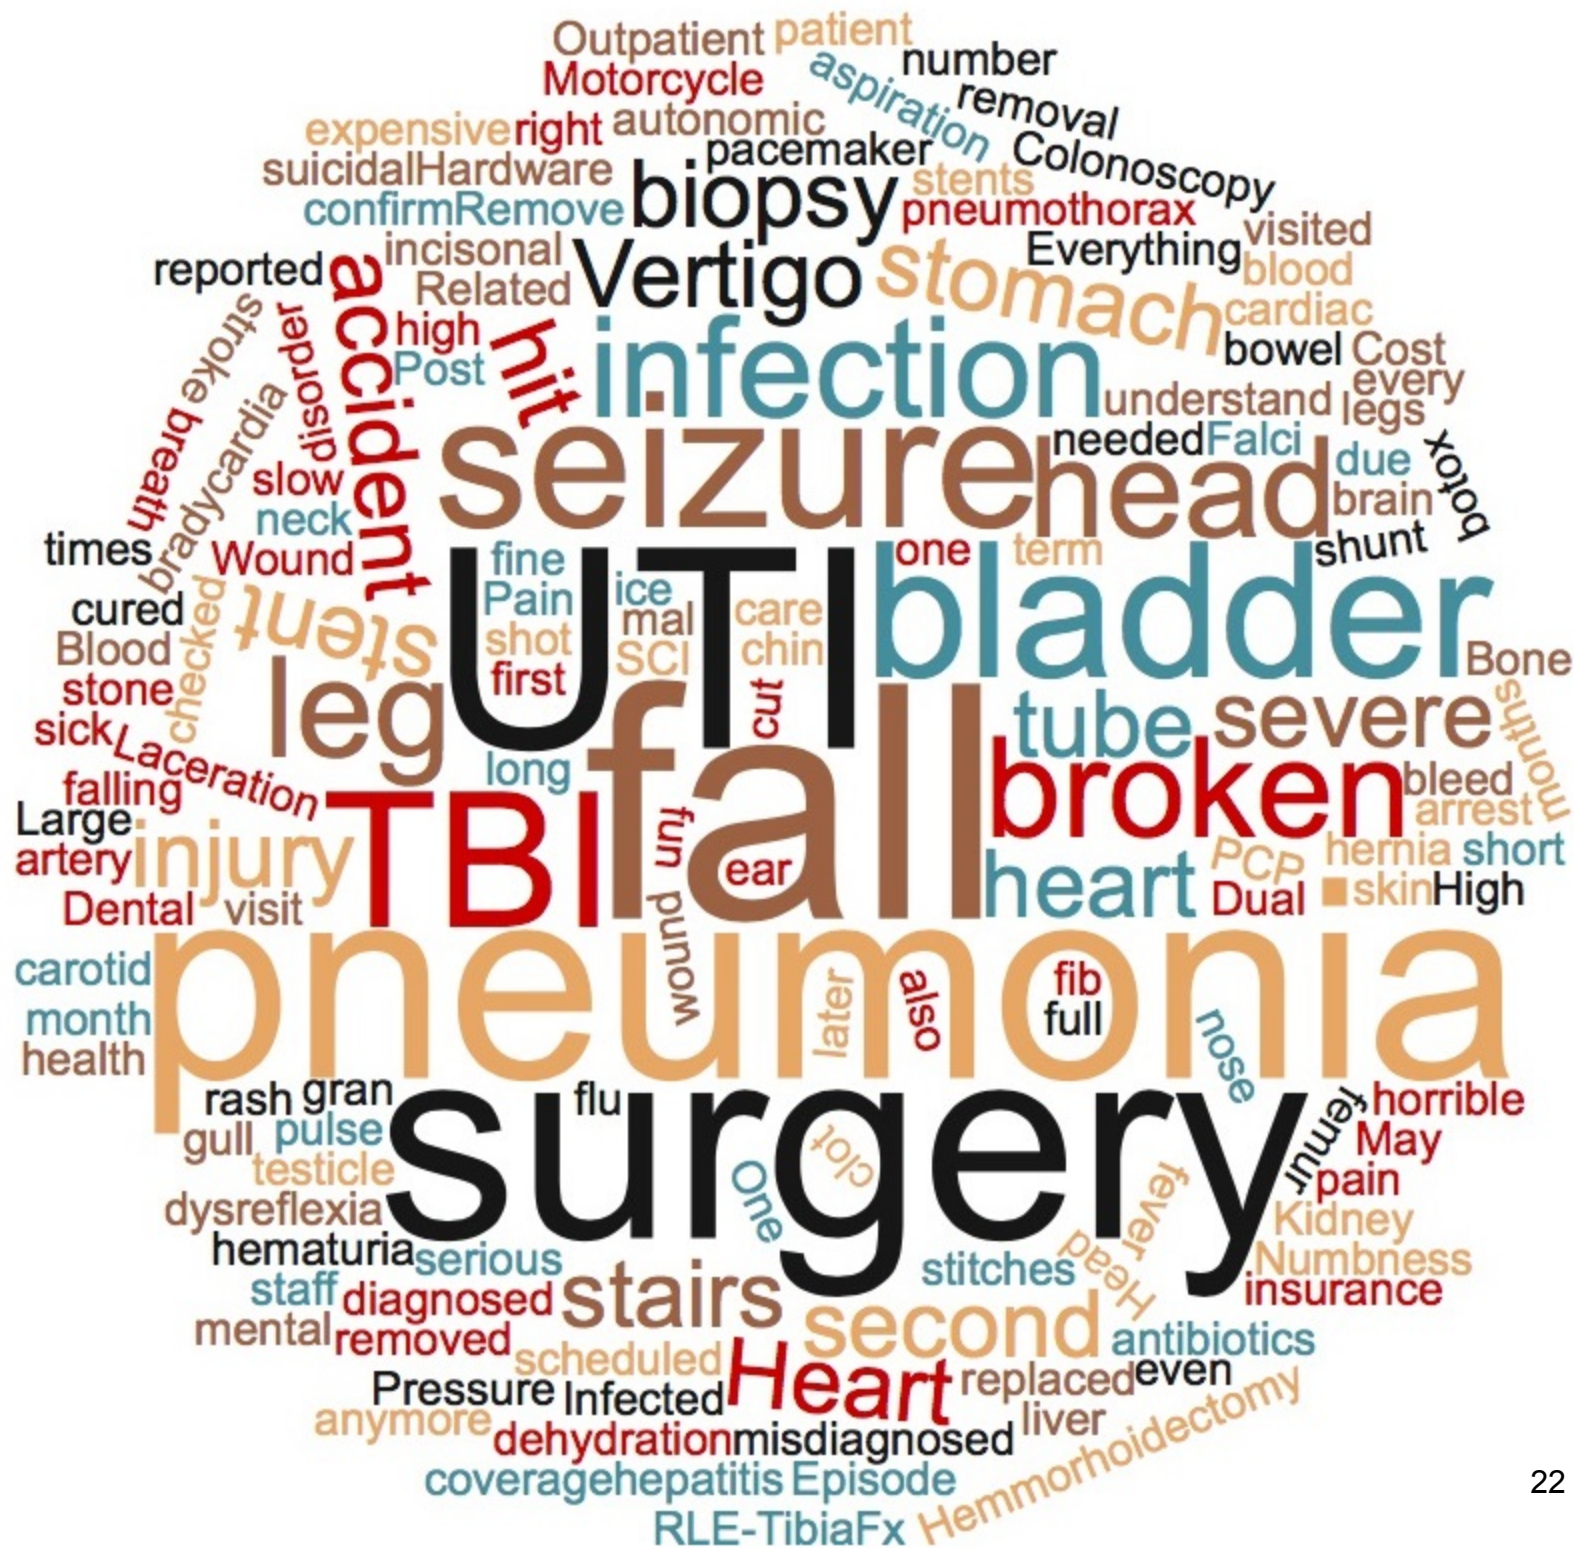

Are you limited in any way in any activities because of physical, mental, or emotional problems?

Do you now have any health problem that requires you to use special equipment, such as a cane, a wheelchair, a special bed, or a special telephone?

CDPHE showed prevalence of disability among each demographic by first looking at each demographic variable and then by the presence of condition/disease/risk factor, etc. This is why for the Demographics section, we first look at each demographic variable and then the presence of reported disability.

Example: The percent of all White (non-Hispanic) population that were disabled (best shows prevalence of disability) VERSUS The percent of all disabled persons that were White (non-Hispanic). The latter will essentially only reflect the general distribution of race/ethnicity which is the same general race/ethnicity distribution for any population in Colorado. NOTE: This is why none of the demographic tables will equal 100%.

Reasons for any hospitalizations or emergency room use:

In your community, are there things you need or like to do but are unable to do?

In your community, what are the primary obstacles preventing you from doing what you need to do?

In your community, what would be necessary to help you to do the things you need or like to do?
