RESEARCH STUDY ON BRAIN HEALTH AFTER BRAIN INJURY

THRIVING AFTER TBI

Identifying resilience-related
factors for psychosocial
growth following TBI

We are interested in understanding how individuals psychologically and socially adjust in the first 18 months after a traumatic brain injury (TBI).

We are seeking individuals with recent TBI and/or their loved ones who:

- Were admitted to a hospital less than 72 hours after injury
- Have a complicated mild, moderate or severe TBI
- Were 18 years or older at time of injury
- Can participate in interviews at 6, 12 and 18 months post-injury

For more information, contact THRIVE-TBI-Study@craighospital.org.
